MPE is developing a new, revolutionary, product that is going to use partially spent coffee grounds in a cost-free strategic input for soluble coffee factories in the United States which produce cold brew and instant coffees. Organic waste from the factories will be used to create soil amendments and fertilizer. All coffee manufacturing byproducts will be repurposed into safe, green, and environmentally friendly products (the waste streams of the previous two points would likely end up in our solid waste facility otherwise).

This is a new design that will be strategic from an environmental as well as a product quality standpoint. It is estimated that there will be 10 to 20 new, well-compensated, high-tech process manufacturing jobs created by this expansion. This will create new tax revenue for the community as well as creation of a new US company that will be manufacturing here for distribution in the US and globally.

3. The Disclosing Party and, if the Disclosing Party is a legal entity, all of those persons or entities identified in Section II(B)(1) of this EDS:

c. are not presently indicted for, or criminally or civilly charged by, a governmental entity (federal, state or local) with committing any of the offenses set forth in subparagraph (b) above;
