For LOADING ZONE with billing address of 6311 North Milwaukee Avenue.

**SECTION 2.** This ordinance shall take effect and be in force here in after its passage and publication.

JOHN ARENA  
Alderman, 45<sup>th</sup> Ward

1. *Chlorophyll a* (Chl *a*)  
2. *Chlorophyll b* (Chl *b*)  
3. *Carotenoids*

The *Chlorophyll a* (Chl *a*) is the primary photosynthetic pigment in most plants and algae. It is a green pigment that absorbs light energy in the blue-violet and red-orange regions of the visible spectrum. The *Chlorophyll b* (Chl *b*) is a secondary photosynthetic pigment that absorbs light energy in the blue-green and yellow-green regions of the visible spectrum. It is a yellow-green pigment that transfers energy to Chl *a* for use in photosynthesis. Carotenoids are a group of pigments that absorb light energy in the blue-violet and yellow-green regions of the visible spectrum. They are responsible for the yellow, orange, and red colors of autumn foliage. Carotenoids also act as antioxidants and protect the plant from damage by reactive oxygen species.

4. *Xanthophylls*  
5. *Lutein*
