Beneficial Ownership. The following table lists the beneficial ownership of WEC Energy Group common stock of each director nominee, NEO, and of all of the directors and executive officers as a group as of January 31, 2017. Included are shares owned by each individual's spouse, minor children, or any other relative sharing the same residence, as well as shares held in a fiduciary capacity or held in WEC Energy Group's Stock Plus Investment Plan and WEC Energy Group's 401(k) plans. None of these persons beneficially owns more than 1% of the outstanding common stock.

⁽¹⁾ Information on beneficially owned shares is based on data furnished by the specified persons and is determined in accordance with Rule 13d-3 under the Securities Exchange Act of 1934, as amended, as required for purposes of this proxy statement. It is not necessarily to be construed as an admission of beneficial ownership for other purposes.

⁽²⁾ Certain directors, NEOs, and other executive officers also hold share units in the WEC Energy Group phantom common stock account under WEC Energy Group's deferred compensation plans as indicated: Mr. Bergstrom (59,202), Ms. Bowles (772), Mr. Culver (83,396), Mr. Fischer (4,568), Mr. Garvin (6,642), Mr. Keyes (1,075), Mr. Lauber (1,010), Ms. Martin (819), Ms. Stanek (13,959), and all directors and executive officers as a group (197,967). To the Company's knowledge, based on information provided by the reporting persons, all applicable reporting requirements for fiscal year 2016 were complied with in a timely manner, except for one exercise of stock options on February 8, 2016 for Joan Shafer which, because of an administrative error, was inadvertently reported late.

ELECTRONIC ACCESS TO ANNUAL MEETING INFORMATION

Why did I receive a separate Notice Regarding the Availability of Proxy Materials instead of printed Proxy Materials?

Pursuant to rules adopted by the Securities and Exchange Commission, we are providing access to our proxy materials over the Internet. Accordingly, we began mailing a separate Notice to stockholders on or about March 23, 2017 instead of a full set of our printed proxy materials. The Notice is not a proxy card and cannot be used to vote your shares. However, the Notice does include instructions on how to access our proxy materials online and vote your shares.

As more fully described in the Notice, registered stockholders may choose to access our proxy materials and vote online.

North Shop – Field Service Center
Project Narrative**

INTRODUCTION

The Peoples Gas Light and Coke Company (PGL) proposes to construct a (2) story, 82,433 sf field service center at 4025 West Peterson Avenue. A field service center houses PGL's personnel and assets that are engaged in operating the utility company and maintaining its infrastructure systems. The proposed use is generally compliant with Utilities and Services, Major zoning. We also request that Manufacturing consistent with M3-1 zoning district be a permitted use under the PD. The development does not seek any City of Chicago incentives including TIF funding.

PROJECT RATIONALE

Located on the southwest corner of Peterson Avenue and Pulaski Road, the property was chosen due to its proximity to customers that PGL serves and operating response times to utility service requirements. The property was formerly occupied by a printing company. The building was vacant for approximately 2 years and has been razed to accommodate the proposed development. PGL is undertaking the development in an effort to update its significantly dated service center that it is replacing. The proposed facility represents a commitment to continuing improvement in operating efficiencies, safety, customer service, and employee engagement. PGL commissioned an extensive analysis of its Chicago metropolitan operations and real estate holdings that has served as the foundation for establishing a comprehensive operational and facility development plan. This project is a direct result of that analysis as well as an extensive site selection process. Site selection addressed service travel distances and proximities to the customer service zone that this location will serve.

PUBLIC PROCESS TO DATE

PGL is committed to be a good neighbor and a contributing part of every community it serves. As such, PGL has been working with the local Alderman's office (Laurino) for well over a year now to ensure that the development of the project is acceptable to the neighborhood and has the Alderman's support. PGL holds standing monthly meetings with Alderman Laurino and conducted a Community Meeting on February 6, 2018 with the Alderman to present the project to the community and to receive community feedback.

STRATEGY	THRESHOLD	POINTS
Exceed Energy Code by 10%	This strategy involves exceeding the baseline model currently required in the Chicago Energy Conservation Code by a minimum of 5%. Additional points will be provided according to how much the project exceeds the current code requirements. The points associated with this strategy are cumulative so a project can only choose one based on how much it is exceeding the code requirements.	30
Exceed Stormwater Ordinance by 25%	The stormwater management plan must provide storage for 125% of the volume required by both the Rate Control and Volume Control components of the City of Chicago's Stormwater Ordinance.	10
Tree Planting	Projects must provide a minimum of 500 cubic feet of soil volume per tree, with a minimum depth of 2.5 feet. When planted together, trees can share soil volumes and overlap up to 33% with each tree having a minimum soil volume of 300 cubic feet.	5
Green Roof 50-100%	A project can earn 10 points if 50-100% of the building's net roof area is covered with vegetation. An additional 10 points can be achieved if the project's green roof includes one of the following characteristics: 1. The green roof growing media is at least 6 inches deep. 2. The plant list chosen for the green roof contains plants from at least 30 genera.	10 10 20 total
Indoor Water Use Reduction by 25%	Calculations are based on estimated occupant usage and include only the following fixtures and fixture fittings (as applicable to the project scope): water closets (toilets), urinals, lavatory faucets, showers, kitchen sink faucets, and pre-rinse spray valves. The water efficiency threshold is calculated as a weighted average of water usage for the buildings constructed as part of the project based on their conditioned area.	10
EV Charging Stations	Install a dual Level 2 Electric Vehicle Charging Station within the project's site area.	10
EV Charging Readiness	Provide parking spaces with panel capacity and dedicated conduit for 208-240V at up to 80 Amps or enough electrical capacity to fully power a Level 2 Electric Vehicle charger for at least 20% of the total parking spaces.	5

80% Waste Diversion	The project recycles or reuses more than 80% of the construction and demolition debris produced on site as part of the project's construction or demolition activities.	10
ALTERNATES		
Basic Bird Protection	Meet a set of criteria common to buildings that experience a high number of migratory bird and insect collisions. These items either aim to minimize collisions or increase the likelihood of survival after a non-fatal collision. Additionally, the lighting criteria listed seeks to reduce the impact of light pollution on nocturnal migrating animals.	5
CTA Digital Displays	Project must provide a readily-visible, digital display of CTA train and bus arrival times in the main lobby and/or at appropriate building exits. They can also be located to be visible from the sidewalk through a window.	5
Natural Landscapes	At-grade landscaped areas must meet two of the following three criteria for a minimum of 5 years: 1. 60% of the species types must be native (straight species or cultivars). 2. The landscape plan must provide at least 3 of the following plant structure types: trees, shrub, forbs or graminoides, excluding turf grass. 3. 40% of the landscaped area must be dedicated to the production of food for landscaped areas larger than 500 square feet.	5
