**SUBJECT: Proposed Street Vacation
Water Main Abandonment and Relocation
1061 W Van Buren Street
S Aberdeen Street – W Van Buren Street to W Tilden Street
W Tilden Street – S Aberdeen Street to W Van Buren Street
BES Project No. 15-12:055
OUC Permit No. 2015-67321 (Vacation)**

Mr. Baziuk:

This correspondence is in response to an Office of Underground Coordination transmittal dated October 14, 2015, regarding the subject street vacation. DWM must review and approve full building plans prior to construction.

The Department of Water Management - Water Section

The Department of Water Management will allow the private contractor of Pizzuti to install approximately 585 feet of proposed 8-inch water main in W Tilden Street from S Aberdeen Street to W Van Buren Street as well as abandon approximately 153 feet of the existing 12-inch water main in S Aberdeen Street from W Van Buren Street to W Tilden Street. This Department will perform the final connections to the existing 12-inch water main in W Van Buren and 8-inch water main W Tilden Street. Street, as well as provide resident engineering services, valve operations, and water quality testing for the above-mentioned work.

The estimated cost for the DWM to provide the above mentioned services is **\$57,200.00** based on premium time. This estimate is based on current rates for labor, material, equipment and overhead charges, but actual costs will be billed to the developer upon completion. Pizutti will be responsible for all restoration.

A certified check in the amount of **\$57,200.00**, payable to the City of Chicago, must be hand delivered to the Department of Buildings, Plumbing Permit and Plan Section, 121 North LaSalle Street, Room 906, Chicago, Illinois, 60602, with a copy of this letter.

Please forward all the CAD files and any resource/reference files to Brian McGahan at Brian.McGahan@ctrwater.net such that they can be utilized to create the water main adjustment plans. Once these plans have been completed, a copy will be forwarded to CDOT. The private contractor installing the water main shall perform the following:

- Submit a complete list of the shop drawings (submittals) for all water main materials to be used to complete the water main installation at least 60 days prior to starting the work. Once the list is approved, the shop drawings (submittals) shall be sent to Brian McGahan at Brian.McGahan@ctrwater.net for review.
- It is required that John Barbaro be contacted at John.Barbaro@ctrwater.net two weeks prior to the anticipated construction date so a resident engineer can be assigned to the project.
- Obtain a "B-Permit" prior to construction from the City of Chicago, Department of Buildings, Plumbing Permit and Plan Section, City Hall, 121 North LaSalle Street, Room 906, Chicago, Illinois 60602.
- Contact John Flynn of the Department of Buildings, Plumbing Permit and Plan Section at (312) 744-7063 regarding the proposed water service installations. Per the Municipal Code, meters shall be installed at the time the building is connected to the water system.
- Submit as-built drawings within two (2) weeks of completion of the work. The as-built drawings should be submitted to the Department of Water Management, Bureau of Engineering Services, Jardine Water Purification Plant, 1000 E. Ohio Street, Room 306, Chicago, Illinois 60611 attention to Rolando Villalon.

Failure to comply with these requirements may result in additional expenses to the project to verify that all work conforms to the DWM's standards.

This Department's utility separation requirements are as follows: The minimum vertical clearance (edge-to-edge) from all water mains is 18-inches. For feeder mains (water mains 16-inches and larger), the minimum horizontal clearance (edge-to-edge) is five (5) feet, and for grid mains (water mains less than 16-inches), the minimum horizontal clearance (edge-to-edge) is three (3) feet. No proposed above ground facility (tree, planter box, light pole, etc.) can be closer than five (5) feet (edge-to-edge) from a water main, water service, or water structure.

All curb installation adjacent to fire hydrants must be painted 'safety yellow' for 15 feet on each side of the fire hydrant except where the 15 foot dimension intersects a crosswalk, driveway or similar feature. In no case shall the installation of any proposed facility be closer than five (5) feet from a fire hydrant or fire hydrant lead.

Any traffic and pedestrian protection structures such as canopies, scaffolding, jersey walls, construction barricades, etc., which are located within 10 feet of water main facilities will restrict this Department's continuous access to its facilities for maintenance or repair work. Therefore, should this Department require access to its existing facilities, Pizzuti will be responsible for either removing the traffic and pedestrian protection structures or performing any necessary excavation required to provide this Department safe access to its existing facilities. Traffic and pedestrian protection structures must be installed to allow for complete accessibility to all DWM facilities, including fire hydrants, valve basins, sewer manholes, and catch basins.

Proposed trees must not be planted within 5 feet of the exterior pipe wall for all water mains 24-inch in diameter and larger. This 5-foot rule excludes mains that are separated from the tree by a hardscape feature or other root growth limiting conditions such as water mains located in the street.

This Department discourages tree planting over water mains that are less than 24-inches in diameter located in the parkway, but if necessary will allow trees with a maximum mature height of 30 feet and a maximum mature root depth of 2½ feet. Potential plantings that meet this requirement include the following:

1. Ornamental shrubs or bushes meeting the mature height and mature root depth discussed above.
2. Flowers or other non-woody herbaceous plants.
3. Above ground, movable planting containers that can be relocated by the owner of the plantings in the event that access to the water main is required.

Existing trees planted above water mains that do not meet these requirements do not need to be removed. However, if such existing trees are removed, all proposed trees installed in their place must meet the above-mentioned requirements. Should it be necessary for the DWM to access any of its facilities, the Department shall only be responsible for typical pavement, concrete sidewalk, and hydroseed restoration.

The Department of Water Management - Sewer Section

The DWM Sewer Section is in the process of reviewing the subject project and will forward their response when completed.

If there are house drains which enter the proposed site of construction, they will have to be sealed and bulkheaded at the property line under direct supervision of the Sewer Section. If the developer intends to re-use any existing drains, they must be televised and the video tape(s) submitted to the Sewer Section prior to approval. In addition, all existing sewers adjacent to the project site must be televised before the start of construction activities and after the completion of construction activities. Refer to "existing facility protection" requirements for sewers.

June 9, 2016

If construction requires the use of water from a City fire hydrant, or adjustments or repairs are required to any City sewer facilities in proximity to the project site, permits must be obtained from the Department of Water Management, Water and Sewer Sections.

If barricades, catwalks or canopies are erected for pedestrian protection, they must be installed in such a manner so that complete accessibility to all fire hydrants, valve basins, sewer manholes, and catch basins is maintained.

Extreme caution is to be taken to ensure that no facility owned and maintained by this Department is damaged during construction. If damage occurs to any facilities, Pizzuti will be held responsible for the cost of repairing or replacing them.

Please note that the details described above are valid for 90 days from the date of this letter, after which time, Pizzuti will be responsible for re-submitting plans to this Department for review and revision of the estimate of cost, as needed.

If there are any questions regarding the water facilities, please contact Brian McGahan at Brian.McGahan@ctrwater.net, and for any questions regarding sewer facilities, contact Sid Osakada at Sid.Osakada@cityofchicago.org.

Sincerely,
