**DEPARTMENT OF WATER MANAGEMENT
CITY OF CHICAGO**

August 14, 2019

McHugh Construction
1737 S Michigan Avenue
Chicago, IL 60616

Attention: Dave Alexander
President

**SUBJECT: Estimate for Proposed Street Vacation
S Wentworth Avenue – W 76th Street to W 77th Street
BES Project No. 18-04:122
OUC File No. 2018-81471 (Vacation)**

Mr. Alexander:

This correspondence supersedes the previously issued DWM letter dated August 31, 2018, and is in response to an Office of Underground Coordination transmittal dated March 12, 2018, regarding the proposed street vacation.

The Department of Water Management - Water Section

The Department of Water Management cannot approve the vacation as currently submitted. This Department maintains an existing and active 2-inch water service located on the western frontage of S Wentworth Avenue at approximately 52 feet south of the south property line of W 76th Street that must remain in service. Therefore, the S Wentworth Avenue right-of-way from the south property line of W 76th Street to the 62 feet south of the south property line of W 76th Street must remain public right-of-way.

In order to accommodate the proposed vacation of S Wentworth Avenue from 62 feet south of the south property line of W 76th Street to the north property line of W 77th Street, the existing 8-inch water main within these limits shall be converted into a private water service. The DWM must install two proposed 8-inch service control valves within the public right-of-way at the following locations:

- 57 feet SSL of W 76th Street on S Wentworth Avenue
- 20 feet SNL of W 77th Street on S Wentworth Avenue

The estimated cost for the DWM to perform this work is **\$42,700.00**. The DWM will perform the excavation and backfill the excavated areas, but McHugh Construction's contractor will be responsible for final restoration. This estimate is based on current rates for labor (straight time), pipe, fittings, equipment and overhead charges, but actual costs will be billed upon completion.

McHugh Construction's contractors must install two (2) compound meters at the same time the DWM installs the above-mentioned 8-inch service control valves at the following locations:

- South of the proposed valve basin at 57 feet SSL of W 76th Street on S Wentworth Avenue to be located as close to the property line as field conditions allow

- North of the proposed valve basin at 20 feet SNL of W 77th Street on S Wentworth Avenue to be located as close to the property line as field conditions allow

The owner's plumbing contractor will be responsible for obtaining all applicable permits, tracing equipment, excavation/OSHA shoring, backfill/compaction, abandonment of appurtenances (meter vault, valve box, valve basin, etc.) and all restoration to CDOT standards. The existing 1½-inch meter serving 7620 S Wentworth Avenue can be returned to DWM once the compound meters are installed.

The existing 8-inch water main in S Wentworth Avenue from 62 feet south of the south property line of W 76th Street to the north property line of W 77th Street is not fully amortized. The total fixed unamortized cost is **\$116,945.00**.

Please note that McHugh Construction assumes all ownership, maintenance, and liability for the converted 8-inch water main within the vacated limits, including the existing fire hydrant located at 7620 S Wentworth Avenue. Any existing or proposed fire hydrants on the private water service will be private fire hydrants and must be painted 'Federal Safety Green'. Also, the private fire hydrants must be annually inspected and tested by the Commissioner of Fire.

Two separate certified checks in the amounts of **\$42,700.00** and **\$116,945.00**, payable to the City of Chicago, must be hand delivered to the Department of Buildings, Plumbing Permit and Plan Section, 121 North LaSalle Street, Room 906, Chicago, Illinois, 60602, with a copy of this letter.

Any traffic and pedestrian protection structures such as canopies, scaffolding, jersey walls, construction barricades, etc., which are located within 10 feet of water main facilities will restrict this Department's continuous access to its facilities for maintenance or repair work. Therefore, should this Department require access to its existing facilities, McHugh Construction will be responsible for either removing the traffic and pedestrian protection structures or performing any necessary excavation required to provide this Department safe access to its existing facilities within 24-hour notice. Traffic and pedestrian protection structures must be installed to allow for complete accessibility to all DWM facilities, including fire hydrants, valve basins, sewer manholes, and catch basins.

All sewer installations must meet IEPA separation requirements for water and sewer pipes. All proposed/replaced sewer laterals from catch basins/inlets, sewer mains, and private drains (collectively known as "sewer facilities") that are parallel to water mains, services or fire hydrant leads (collectively known as "water facilities") that are less than 18 inches below the water facility and have less than 10 feet of horizontal separation from the outside edge of the water facility must be made out of ductile iron/water main quality pipe for 10 feet on either side of the outside edge of the water facility. Additionally, all sewer facilities that cross perpendicularly below water facilities with less than 18 inches vertical separation must be made out of ductile iron/water main quality pipe for 10 feet on either side of the outside edge of the water facility. If any sewer facility crosses perpendicularly above a water facility, then the sewer facility shall be at least 18 inches above the water facility and the sewer facility must be made out of ductile iron/water main quality pipe for 10 feet on either side of the outside edge of the water facility. Sewer laterals that require ductile iron/water main quality pipe shall be ductile iron/water main quality pipe from the catch basin to a point 10 feet beyond the edge of the water facility.

If construction requires the use of water from a City fire hydrant, or adjustments or repairs are required to any City sewer facilities in proximity to the project site, permits must be obtained from the Department of Water Management, Water and Sewer Sections.

Proposed trees must not be planted within 5 feet of the exterior pipe wall for all water mains 24-inch in diameter and larger. This 5-foot rule excludes mains that are separated from the tree by a hardscape feature or other root growth limiting conditions such as water mains located in the street.

This Department discourages tree planting over water mains that are less than 24-inches in diameter located in the parkway, but if necessary will allow trees with a maximum mature height of 30 feet and a maximum mature root depth of 2½ feet. Potential plantings that meet this requirement include the following:

1. Ornamental shrubs or bushes meeting the mature height and mature root depth discussed above.
2. Flowers or other non-woody herbaceous plants.
3. Above ground, movable planting containers that can be relocated by the owner of the plantings in the event that access to the water main is required.

Existing trees planted above water mains that do not meet these requirements do not need to be removed. However, if such existing trees are removed, all proposed trees installed in their place must meet the above-mentioned requirements. Should it be necessary for the DWM to access any of its facilities, the Department shall only be responsible for typical pavement, sidewalk, and hydroseed restoration.

Extreme caution is to be taken to ensure that no facility owned and maintained by this Department is damaged during construction. If damage occurs to any facilities, McHugh Construction will be held responsible for the cost of repairing or replacing them.

Please note that the details described above are valid for 90 days from the date of this letter, after which time, McHugh Construction will be responsible for re-submitting plans to this Department for review and revision of the estimate of cost, as needed. ***Failure to comply with the provisions in this correspondence may result in additional expenses to the proposed project to verify that all work conforms to DWM's standards.***

If there are any questions regarding the water facilities, please contact Brian McGahan at Brian.McGahan@ctrwater.net.

Sincerely,

Randy Conner
Commissioner
