SUBJECT: Riverside Homes Proposed Subdivision
BES Project No. 19-04:095

Mr. Vlcek:

This correspondence is in response to a request from Morgan Street Development regarding the proposed subdivision of the Riverside Homes development and is pursuant to a May 22, 2019, meeting with the Department of Water Management (DWM).

The DWM cannot accept ownership of the existing water and sewer facilities within this proposed subdivision since the existing facilities do not meet DWM's standards nor requirements. The subdivision was not initially designed to DWM's standards and constructed without proper DWM inspection since the water and sewer facilities were to be private. The existing water main is not sized appropriately to meet fire flow requirements. The existing sewer system was constructed with separate sanitary and storm mains, along with a bioswale, all as a private system. Additionally, the design drawing for the utilities in the proposed subdivision show violations of water/sewer separation requirements set forth in the Illinois Administrative Code Title 35. The DWM requires that the existing water and sewer facilities remain privately owned as stated within the executed covenant for the subdivision (attached). An easement or Grant of Privilege for private utilities within the proposed public way needs to be added to the proposed subdivision documents.

Should Morgan Street Development request that the DWM take ownership of the water facilities within the subdivision, Morgan Street Development must replace all the water facilities to meet DWM's standards and requirements, including Illinois Administrative Code Title 35 water/sewer separation requirements, at Morgan Street Development's sole cost and expense, and comply with the following:

- The current 8-inch water main within W Grove Street, S Broad Street, and S Pitney Court must be upsized to a 12-inch water main to meet fire flow requirements. All existing pipe, valves, fire hydrants, fittings and other appurtenances must be replaced to current DWM standards.

The proposed water main must be Class 56 ductile iron pipe, polywrapped and backfilled per current DWM standards.

- The existing master meter is to be removed, the account canceled, and all residences within the proposed subdivision must have new water services from the proposed 12-inch water main to a new service control valve and meter vault within the parkway. All existing water service pipe, fittings, shut-off boxes and other appurtenances must be replaced to current DWM standards. The proposed water services must be Type K copper tubing and backfilled per current DWM standards. Any brass parts or fittings must adhere to the "No-Lead Brass" provisions of the City of Chicago Municipal Code.
- Plans must be submitted to the DWM for review and approval of the proposed 12-inch water main prior to construction. All permits for the work must be obtained, including individual water service permits for each residence for which a new water service will be required. All work is to be inspected by the DWM and installed to DWM's standards.
- Morgan Street Development shall be responsible for DWM's actual costs of involvement in the project. The DWM will have construction inspection services during Morgan Street Development contractor's work, water quality services, and make the final water connection in S Lock Street at an approximate cost of \$60,000. Once the new water main is approved for service, the DWM will also make the tap (only) for each water service at an estimated cost of \$1,800 each. Note that the costs listed above are approximate only and the DWM will provide more developed estimates once plans have been submitted to the DWM for review and approval.
- All sewer and water installations must meet separation requirements pursuant to Illinois Administrative Code Title 35 and City of Chicago Municipal Code.

Should Morgan Street Development request that the DWM take ownership of the sewer facilities within the subdivision, Morgan Street Development must meet DWM's standards and requirements, including Illinois Administrative Code Title 35 water/sewer separation requirements, at Morgan Street Development's sole cost and expense, and comply with the following:

- Verify the roof drainage system is independent of any other storm water.
 - The existing private roof drainage system within the area to be dedicated must have a private easement established at the expense of the beneficiary.
- The storm water system that drains the proposed dedicated area must be separate from the existing drainage system required for the site's stormwater management plan. Currently, the surface drainage from the areas to be dedicated flow into the river through private bioswale. All proposed areas to be dedicated must have a separate public storm drainage system that directly drains to the river. The use of the bioswale is not to be used for public ROW drainage. All public storm drainage systems outside the areas to be dedicated must have proper easements or Grant of Privileges established at the expense of the beneficiary.

- Any underground sewer work, including separate public main storm sewers and structures associated with the proposed dedications, must be submitted for review and installed at the expense of the beneficiary. The maintenance of the new separate public storm sewers and structures will be accepted by the DWM only after physical and videotape inspection approved by the DWM.
- All sewer and water installations must meet separation requirements pursuant to Illinois Administrative Code Title 35 and City of Chicago Municipal Code.

For both the proposed water and sewer facilities, any existing above ground structures within the proposed public way (light poles, trees, etc.) may need to be relocated by Morgan Street Development to accommodate DWM's separation requirements from such facilities. Also, Morgan Street Development shall be responsible for relocating any existing underground utilities (power, gas, phone, etc.) that are in conflict with the proposed water and sewer facilities or that do not meet DWM's separation requirements.

If there are any questions or concerns, please contact Bulent Agar at 312-744-5070.

Sincerely,

Randy Conner
