### Project Narrative

In order to foster the City's industrial base, enhance its diversified economy, and to more efficiently support the City's investment in critical infrastructure repair and replacement, Reliable Asphalt Corporation has applied for a special use permit to establish a Class V recycling operation, reprocessable construction and demolition material recycling operation, redi-mix operation, and material storage operation in Planned Manufacturing District 6 within property located at 3203 East 100th Street, Chicago, Illinois.

Materials to be processed at this facility will be used primarily in repaving and trench backfill projects for the City of Chicago. Operations will include sorting and crushing broken concrete and asphalt; sorting, crushing, and grinding broken asphalt and asphalt shingles; and storing and transferring clean soil. A complete description of the types of materials that may be processed onsite is provided herewith as part of a letter to Patricia Scudiero from Jacob Mrugacz dated February 6, 2018. Warehousing and business-to-business sales of raw materials also will be conducted onsite.

Private contractors and City of Chicago construction crews will have a convenient south side location where waste can be recycled and raw materials can be purchased. Site operations will reduce truck staging and traffic on local streets, thereby reducing wear and tear on local roadways.

At this time, soil, broken concrete, and broken asphalt pavement and asphalt shingles generated from construction -- including the City of Chicago's extensive water and sewer main replacement program - is often hauled long distances. The waste materials are transported from construction sites to transfer stations then to final disposal facilities. Some contractors working on projects in the City must leave the City to deliver materials for recycling then must make additional stops to pick up raw materials. At this time, the nearest similar facilities are operating at 2100 South Kilbourne Avenue, 21.1 miles from the subject site, and 3741 South Pulaski Road, 17.3 miles from the subject site.

The proposed operation will offer an alternative location where construction crews can both drop off construction and demolition waste and also pick up raw materials. The facility will improve efficiencies in all south side construction jobs because trucks will be able to drop off and load up at the same site. In addition, raw and processed materials will be transported via barge using the adjacent channel and Calumet River.

Applicant enjoys a positive reputation for engaging with the local community to produce favorable outcomes and long-term positive impacts. It has been responsibly serving the community from its location at 3741 South Pulaski Road for over 30 years. That facility holds a Class V license and conducts operations that are similar to those proposed for the subject property. Applicant also operates a similar facility at 4613 West Grand Avenue; that facility holds environmental permits for both Class V and reprocessable construction and

demolition material recycling operations.

The subject site is in an industrial area, adjacent to railroad tracks and the Calumet River, with very few residential neighbors (nearest home is more than 250 feet from the operation). Likewise, no schools, childcare facilities, nursing homes, hospitals or parks are near the proposed operation. The proposed use is comparable to the current use and consistent with the goals and objectives of PMD 6.
