## Product Benefits

^Nichia Sihgije Bin SfvIT LED- for Maximum Reliability and Color Consistency

### ^Protective Optical Lens^

- New optical Lens creates a wide viewing angle which maximizes light coverage.
- Protects LED from lumen degradation and environmental damage
- Nichia has agreed to supply us customer-specific color bins for each of the options in the AgiLight SignRayz product lines. These customer-specific color bins have smaller sizes than standard ANSI color specs, which will result in a better color and brightness uniformity for signage applications. Our agreement with Nichia also allow us to be able to ship individual color corrected temperatures in high volumes to support large custom signage programs.

### i 'Constant Current Technology

- \*CCT keeps consistent current levels, •eliminating current change due to forward voltage variation in many LED lighting systems. •CC? provides uniform light output throughout the entire installation, While also preventing damage from overdriving of the LEDs. •CCf allows for wiring in parallel or series without complicated load balancing.*

Confidential

## AgiLight SignRayz® Series Product Benefits

(continued)

## Over-ftMdeo! Housing Design-

- Designed to protect components from moisture,, damage, and corrosion
- Utilizes a new double sided circuit board with "thermal vies" to double the surface area for heat dissipation.. Allocs us; to rate product for environments of -4P<sup>9</sup>C to +70°C which is +10° G higher than other manufacturers.
- Continuous wire through module uses iDG connectors vs. soldering for maximum strain relief
- Reinforced mounting holes for #6 & #8 screws or pop rivets. Also 3M VHB tape pre-app)ied to each module

## Standard 12 Volt DC system

Minimum: 50,000 ho;ur rated to the L70 life

5-Year Warranty on LED and Power Supplies

UL Listed for New Signs and Retrofits.
