It will make any changes in its 49 U.S.C. 5332 and Title VI implementing procedures as U.S. DOT or FTA may request.

D. Control of Property. The AGENCIES each certify that the control, utilization and disposition of property or equipment acquired using federal funds is maintained according to the provisions of 2 CFR Part 200, Subpart D, Property Standards.

E. Cost Principles. The AGENCIES certify that the cost principles and indirect cost proposals of this Agreement are consistent with 2 CFR Part 200, Subpart E, and Appendix VII to Part 200, and all costs included in this Agreement are allowable under 2 CFR Part 200, Subpart E, and Appendix VII to Part 200.

The inability of the AGENCIES to certify to the certification in this section will not necessarily result in denial of participation in this Agreement. The AGENCIES shall submit an explanation of why it cannot provide the certification in this section. This certification is a material representation of fact upon which reliance was placed when the DEPARTMENT determined whether to enter into this transaction. If it is later determined that the AGENCIES knowingly rendered an erroneous certification, in addition to other remedies available to the federal government, the DEPARTMENT may terminate this Agreement for cause. The AGENCIES shall provide immediate written notice to the DEPARTMENT if at any time the AGENCIES learn that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this Part shall have the meaning set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549.

The AGENCIES agree that it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible or voluntarily excluded from participation in this covered transaction, unless authorized, in writing, by the DEPARTMENT. The AGENCIES agree that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transaction," provided by the DEPARTMENT, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions. The AGENCIES may rely upon a certification of a prospective participant in a lower tier covered transaction

BoBS 2805 (Rev 04/01/2016) 1 April 2016

that it is not debarred, suspended, ineligible or voluntarily excluded from the covered transaction, unless the AGENCIES knows the certification is erroneous. The AGENCIES may decide the method and frequency by which it determines the eligibility of its principals. The AGENCIES may, but is not required to, check the Non-procurement List. If the AGENCIES knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible or voluntarily excluded from participation, in addition to other remedies available to the federal government, the DEPARTMENT may terminate this Agreement for cause or default.

Nothing contained in this section shall be construed to require establishment of a system of records in order to render in good faith the certification required by this section. The knowledge and information of the AGENCIES is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

G. Audit Requirements. The AGENCIES each certify that it will comply with the requirements of 2 CFR Part 200, Subpart F, Section 200.501, which sets forth standards and requirements for obtaining consistency and uniformity for the audit of non-Federal entities expending Federal awards, as follows:

2. Single audit. A non-Federal entity that expends \$750,000 or more during the non-Federal entity's fiscal year in Federal awards must have a single audit conducted except when it elects to have a program-specific audit.
3. Program-specific audit election. When an auditee expends Federal awards under only one Federal program (excluding R&D) and the Federal program's statutes, regulations, or the terms and conditions of the Federal award do not require a financial statement audit of the auditee, the auditee may elect to have a program-specific audit. A program-specific audit may not be elected for R&D unless all of the Federal awards expended were received from the same Federal AGENCIES, or the same Federal AGENCIES and the same pass-through entity, and that Federal AGENCIES, or pass-through entity in the case of a subrecipient, approves in advance a program-specific audit.
4. Exemption when Federal awards expended are less than \$750,000. A non-Federal entity that expends less than \$750,000 during the non-Federal entity's fiscal year in Federal awards is exempt from Federal audit requirements for that year, except as noted in §200.503 Relation to other audit requirements, but records must be available for review or audit by appropriate officials of the Federal AGENCIES, pass-through entity, and Government Accountability Office (GAO).

5. Except for the provisions for biennial audits provided in paragraphs (a) and (b), audits required by this part must be performed annually. Any biennial audit must cover both years within the biennial period.
 - a. A state, local government, or Indian tribe that is required by constitution or statute, in effect on January 1, 1987, to undergo its audits less frequently than annually, is permitted to undergo its audits pursuant to this part biennially. This requirement must still be in effect for the biennial period.
 - b. Any nonprofit organization that had biennial audits for all biennial periods ending between July 1, 1992, and January 1, 1995, is permitted to undergo its audits pursuant to this part biennially.
6. The audit must be completed; the data collection form described in Appendix X to Part 200 and reporting package must be submitted within the earlier of 30 calendar days after receipt of the auditor's report(s), or nine months after the end of the audit period.
7. Reporting package. The reporting package must include the following:
 - a. Financial statements and schedule of expenditures of Federal awards discussed in §200.510 Financial statements, paragraphs (a) and (b), respectively;

BoBS 2805 (Rev 04/01/2016) 1 Apr 2016

- H. Drug Free Workplace. The AGENCIES each certify that it will comply with the requirements of the federal Drug Free Workplace Act, 41 U.S.C. 702 as amended, and 49 CFR 32.
- I. Disadvantaged Business Enterprise Assurance. In accordance with 49 CFR 26.13(a), as amended, the AGENCIES assures that it shall not discriminate on the basis of race, color, national origin, or sex in the implementation of the project and in the award and performance of any third party contract, or subagreement supported with Federal assistance derived from the U.S. DOT or in the administration of its Disadvantaged Business Enterprise (DBE) program or the requirements of 49 CFR Part 26, as amended. The AGENCIES assures that it shall take all necessary and reasonable steps set forth in 49 CFR Part 26, as amended, to ensure nondiscrimination in the award and administration of all third party contracts and subagreements supported with Federal assistance derived from the U.S. DOT. The AGENCIES' DBE program, as required by 49 CFR Part 26, as amended, will be incorporated by reference and made a part of this Agreement for any Federal assistance awarded by FTA or U.S. DOT. Implementation of this DBE program is a legal obligation of the AGENCIES, and failure to carry out its terms shall be treated as a violation of the Agreement. Upon notification by the Federal Government or the DEPARTMENT to the AGENCIES of its failure to implement its approved DBE program, the U.S. DOT may impose sanctions as provided for under 49 CFR Part 26, as amended, and may in

appropriate cases, refer the matter for enforcement under 18 U.S.C. 1001, as amended, and/or the Program Fraud Remedies Act, 31 U.S.C. 3801 et seq., as amended.

J. Assurance of Nondiscrimination on the Basis of Disability. As required by U.S. DOT regulations, "Nondiscrimination on the Basis of Handicap in Programs and Activities Receiving or Benefiting from Federal Financial Assistance," at 49 CFR 27.9, the AGENCIES assures that, as a condition to the approval or extension of any Federal assistance awarded by FTA to construct any facility, obtain any rolling stock or other equipment, undertake studies, conduct research, or to participate in or obtain any benefit from any program administered by FTA, no otherwise qualified person with a disability shall be, solely by reason of that disability, excluded from participation in, denied the benefits of, or otherwise subjected to discrimination in any program or activity receiving or benefiting from Federal assistance administered by the FTA or any entity within U.S. DOT. The AGENCIES assures that project implementation and operations so assisted will comply with all applicable requirements of U.S. DOT regulations implementing the Rehabilitation Act of 1973, as amended, 29 U.S.C. 794, et seq., and the Americans with Disabilities Act of 1990, as amended, 42 U.S.C. 12101 et seq., and implementing U.S. DOT regulations at 49 CFR parts 27, 37, and 38, and any applicable regulations and directives issued by other Federal departments or agencies.

K. Procurement Compliance Certification. The AGENCIES each certify that its procurements and procurement system will comply with all applicable third party procurement requirements of Federal laws, executive orders, regulations, and FTA directives, and requirements, as amended and revised, as well as other requirements FTA may issue including FTA Circular 4220.1F, "Third Party Contracting Guidance," and any revisions thereto, to the extent those requirements are applicable. The AGENCIES certify that it will include in its contracts financed in whole or in part with FTA assistance all clauses required by Federal laws, executive orders, or regulations, and will ensure that each subrecipient and each contractor will also include in its subagreements and its contracts financed in whole or in part with FTA assistance all applicable clauses required by Federal laws, executive orders, or regulations.

L. Intelligent Transportation Systems Program. As used in this assurance, the term Intelligent Transportation Systems (ITS) project is defined to include any project that in whole or in part finances the acquisition of technologies or systems of technologies that provide or significantly contribute to the provision of one or more ITS user services as defined in the "National ITS Architecture."

5. The DEPARTMENT must not dispose of any equipment that is acquired under this Agreement without prior AGENCIES' written approval;
6. In cases where the DEPARTMENT fails to dispose of any equipment properly, as determined by the DEPARTMENT, the DEPARTMENT may be required to reimburse the AGENCIES' for the cost of the equipment; and
7. For purposes of this provision, "equipment" includes any tangible or intangible product, having a useful life of two years or more, an acquisition cost of at least \$100, and used solely in DEPARTMENT'S performance under this Agreement.

A. BACKGROUND

On July 11, 2014, the Federal Railroad Administration (FRA) issued a Notice of Funding Availability (NOFA) in the

Federal Register soliciting applications for Passenger Rail Corridor Investment Plan (PRCIP) projects. The appropriations authority to fund the PRCIP projects under this solicitation was provided by Congress under the FY14 Omnibus Appropriations Act.

In response to the NOFA, the DEPARTMENT submitted an application for the Chicago Terminal Planning Study: Chicago -Detroit/Pontiac Service Development Plan (SDP) Expansion (the "Project"). The FRA reviewed the DEPARTMENT'S application against the eligibility, evaluation, and selection criteria outlined in the NOFA. On the basis of this evaluation, the FRA selected the DEPARTMENT for an award, through a cooperative agreement between FRA and the DEPARTMENT, of \$3 million for the Project.

Due to the complexity of implementing intercity passenger rail Service Development Programs, extensive pre-construction preparation is required, including service planning, environmental review, design and conceptual engineering efforts. The first phase of this process, known as the Planning Phase, should result in the development of a PRCIP. A PRCIP provides sufficient information to support a future decision to fund and implement a major investment in a passenger rail corridor and is comprised of two components:

1. An environmental review to satisfy National Environmental Policy Act (NEPA) requirements (Service NEPA), in which the purpose and need of the improvements are defined, and alternatives are analyzed and compared based on their environmental, socioeconomic, and transportation impacts; and
2. A Service Development Plan (SDP) that defines the service improvements, transportation network, operational and financial aspects for the passenger rail service alternative selected through the NEPA process.

Service NEPA for the Chicago-Detroit/Pontiac Corridor is already under preparation in the form of a Tier 1 Environmental Impact Statement (EIS), which was begun by the Michigan DOT in the summer of 2012. Funding for the Service NEPA is not part of this statement of work. Together, the Service NEPA and SDP being performed with the EIS complete the PRCIP to inform potential future funding and implementation decisions for major investment in the Chicago-Detroit/Pontiac Corridor.

For the purposes of this Agreement, the term "Project" means a study that results in an updated SDP (as part of the MDOT PRCIP) for the Chicago-Detroit/Pontiac Corridor.

Also for purposes of this Agreement, the term "Service Development Program" means an enhancement to the existing Chicago-Detroit/Pontiac Corridor SDP covering the Chicago terminus of the corridor. This is appropriate, because it has become apparent that the western most segment of the Corridor into the City of Chicago requires significantly more analysis than can be accomplished in the current planning process. Many other passenger and freight services are impacted by decisions on and near this segment. This update to the SDP does not affect the current projects under construction on this corridor by other FRA grant agreements.

The work will benefit other corridors as well, including Chicago-St. Louis, Chicago-Quad Cities, Chicago-Rockford/Dubuque, and most other Chicago-based passenger corridors, but SDP updates for these corridors are not included in this Project scope.

B. OBJECTIVE

The objective of the Project is to produce an updated and expanded SDP (as a component of the PRCIP) for the Chicago-Detroit/Pontiac Corridor in compliance with FRA's Procedures for Considering Environmental Impacts (64 Federal Register 28545 (May 26, 1999) and the Council on Environmental Quality's (CEQ) NEPA implementing regulation (40 CFR Part 1500 et seq.) The area of expansion will be the Chicago Terminal Study Area, near and approaching Chicago Union Station (CUS), within the state of Illinois. Funding for a Service NEPA will not be accomplished through the FRA Grant/Cooperative Agreement for this Project

BoBS 2805 (Rev 04/01/2016) 1 April 2016

C. PROJECT LOCATION

The Chicago-Detroit/Pontiac Corridor SDP component of the PRCIP is a study of service to be located between CUS and the Indiana/Illinois state line, a distance of approximately 12 miles near Whiting, Indiana on the Chicago-Detroit/Pontiac corridor. Due to the complex network of rail lines, yards, and related infrastructure south of CUS, a large portion of this network must be analyzed to determine impacts and evaluate alternatives resulting in a study area significantly broader than this 12 mile segment. The study area includes CUS and extends about 10 miles to the southwest near La Grange, Illinois along the Metra/BNSF route, about 4 miles west along the Metra/Milwaukee District/Amtrak route through the A-2 Interlocking, and 15 miles to the south to the South Holland, Illinois area. Most of North America's Class 1 railroads own facilities within this area, along with Metra and Amtrak.

To ensure that planning considers the interrelationships of the broader intercity passenger and commuter rail network, the following route(s) beyond the Chicago-Detroit/Pontiac Corridor will be considered to the degree necessary to fully inform service development planning work for the Chicago-Detroit/Pontiac Corridor:

1. Chicago-St. Louis Corridor between CUS and Summit, IL
2. Chicago-Milwaukee Corridor within the City of Chicago between CUS and Tower A-2 on the Metra Milwaukee District North Line
3. Chicago-Rockford/Dubuque Corridor within the City of Chicago between CUS and Tower A-2 on the Metra Milwaukee District West Line
4. Chicago-Quincy and Chicago-Quad Cities Corridors within the City of Chicago between CUS and La Grange, IL
5. Chicago-Carbondale Corridor between CUS and Harvey, IL
6. Chicago-Indianapolis Corridor (and other Indiana/Ohio future routes as may be determined) between CUS and Whiting, IN (currently routed through Harvey, IL)
7. All of Metra's 11 Chicago-area commuter rail lines and the existing South Shore Line and planned West Lake Corridor route both operated by the Northern Indiana Commuter Transportation District (NICTD) over the Metra - Electric District from 115th St. / Kensington into downtown Chicago.
8. Amtrak and Metra equipment movements between CUS and Metra's yards near the A-2 Interlocking, Metra's/BNSF's 14th Street Yard, Amtrak's 18th Street Yard and south across the 21st Street river bridge (Amtrak currently has yard movements that occupy one of the tracks on the 21st Street Bridge).

D. DESCRIPTION OF WORK

This Project is divided into 3 major tasks by which the DEPARTMENT will perform tasks in close coordination with FRA with FRA written approval:

Task 1: project set-up.

Task 2: preliminary service planning and the preparation of other technical information to identify and develop alternatives for the Service Development Plan document. The deliverables resulting from this phase will be used in Task 3.

Task 3: the development of the Service Development Plan document. Tasks 2 and 3 will often overlap, require close coordination, and be conducted through an iterative analytical process.

Task 1: Detailed Project Work Plan, Budget, and Schedule

For this initial task, the DEPARTMENT will prepare a detailed Project Work Plan, Budget, and Schedule for Tasks 2 and 3. The Project Work Plan will describe, in detail, the activities and steps necessary to complete the tasks outlined in the statement of work. The DEPARTMENT shall contact FRA and obtain preliminary direction regarding the appropriate environmental documentation. The DEPARTMENT will describe the Service NEPA approach proposed (which is a tiered EIS for Chicago-Detroit/Pontiac and not included in this scope of work) and reflect this in the level of effort for related

tasks

The project work plan will also include.

BoBS 2805 (Rev 04/01/2016) 1 April 2016

- information about the project management approach (including team organization, team decision-making, roles and responsibilities and interaction with FRA);
- quality assurance and quality control procedures;
- project schedule (with DEPARTMENT and agency review durations); and
- detailed project budget.

The DEPARTMENT will need to secure agreement(s) with potentially a number of host railroads to access the railroad's property and perform the work, so the executed agreements should be included with the work plan. The work plan shall identify studies to be conducted as part of the process for the expansion of the Service Development Program. The Detailed Work Plan, Budget, and Schedule will be reviewed and approved by the FRA, who will make the final decision regarding the class of action and if tiering will be used in a future NEPA process.

The DEPARTMENT acknowledges that work on subsequent tasks will not commence until the Detailed Project Work Plan, Budget, and Schedule has been completed, submitted to FRA, and the DEPARTMENT has received written approval from FRA.

Task 1 Deliverables:

Service Planning and Alternatives

The fundamental starting point of any transportation planning effort is the identification of the objectives for an improvement to the transportation system service in the market. The DEPARTMENT will prepare goals and objectives for this planning study for use in developing the Service Development Program for FRA review. Since NEPA is not included, there will be no NEPA Scoping and Outreach conducted, or Purpose and Need prepared. The DEPARTMENT will identify all possible alternatives for the Service Development Program, including the "no-build or no action alternative," and from this list, conduct a feasibility analysis to identify the reasonable alternatives.

Subtask 2.1 Alternatives Scoping and Outreach

The DEPARTMENT will conduct the scoping process, in coordination with FRA, which will include:

- Identification of the Corridor study area
- Development of an Agency and Stakeholder Involvement Plan
- Holding scoping meetings with the public, stakeholders, and other agencies
- Preparation of a Scoping Report identifying all possible alternatives.

The DEPARTMENT will prepare and implement, in coordination with FRA, an Agency and Stakeholder Involvement Plan. The Plan will outline the public and agency involvement program and will identify key contacts within agencies, public officials, affected Native American Tribes, and other key stakeholder groups and the public. The Plan will also identify key contacts within civic and business groups, relevant interest groups, present and potential riders/users, and private service providers/shippers. The Plan will identify how involvement activities will be linked to key milestones in the planning/engineering and alternatives analysis process, including public meetings/hearings, as necessary. This process will include Tribal coordination to fulfill FRA's Section 106 responsibilities. The DEPARTMENT will submit the Agency and Stakeholder Involvement Plan for FRA review.

In addition, the DEPARTMENT will lead the scoping process, in cooperation with FRA, inviting participation from federal, state, and local agencies, Native American tribes, other interested parties, and the public, as identified in the Agency and Stakeholder Involvement Plan. The DEPARTMENT will record the process and provide a summary of comments, responses, and conclusions in a Scoping Report for FRA review.

Subtask 2.1 Deliverables:

Agency and Stakeholder Involvement Plan

BoBS 2805 (Rev 04/01/2016) 1 April 2016

Scoping Report identifying all possible alternatives

Subtask 2.2 Definition and Evaluation of Alternatives

The DEPARTMENT will prepare a Technical Memo on Service Planning for FRA review, which includes: identification of all possible alternatives, an outline of the proposed approach for alternatives analysis (including identification of the criteria to be used in the alternatives analysis), and an outline for the SDP and overview of the proposed methodologies to be used in preparing the SDP components (See Task 3 for additional information).

The Technical Memo will address how alternatives will be determined to be reasonable and feasible. The alternatives developed for the Service Development Program must address the NEPA purpose and need established in the Chicago-Detroit/Pontiac Corridor Tier 1 EIS. The memo will describe the criteria to be used in the analysis that reflect:

The objective and goals for the action (similar to purpose and need)

Technical feasibility (physical route characteristics, engineering constraints, capacity- constrained existing facilities or infrastructure, safety)

Economic feasibility (market potential and/or ridership, capital and operating costs)

Major environmental concerns

The alternatives analysis will include preliminary service planning elements such as:

A description of the infrastructure improvements including stations, parking facilities, land acquisition, rail operations/maintenance/equipment/storage facilities, any new facilities or upgrades required for intercity passenger rail operational control

Capital cost estimates for each alternative (including unit cost and quantities relating to core track structures and other project components), management, design and construction management allowances, and contingencies

An operating plan for each alternative, including railroad operation simulations, equipment options, and crew scheduling analyses, which in turn reflect such variables as travel demand and rolling stock configuration

An assessment of each alternative's likely direct and indirect impacts on existing and potential future operations of freight trains, commuter trains, and other (non-Chicago-Detroit/Pontiac Corridor) passenger trains

Ridership and travel demand forecasts for each alternative, including origin-destination trip tables suitable as input for other elements of the planning and environmental assessment process, pricing assumptions (including a rationale for pricing strategy), and travel time-related assumptions (including frequency, reliability, and schedule data for the service alternatives)

General estimates of operating, maintenance, and capital renewal costs for a 40-year period

Potential phased implementation plans for the alternatives that can result in service improvements that have independent utility and reflect constructability considerations

After FRA review and approval of the Technical Memo, the DEPARTMENT will conduct the alternatives analysis and

prepare a Definition and Evaluation of Alternatives Report for FRA review and approval. As part of preparing the Definition and Evaluation of Alternatives Report, the DEPARTMENT will develop conceptual engineering to a level sufficient to identify necessary infrastructure improvements and determine the cost estimates for each reasonable route alternative. Conceptual engineering will include developing design criteria, typical track sections, track plans with vertical profiles, structural concepts, roadway crossing recommendations, layover and storage/maintenance facility requirements, and unit cost data. The analysis and conceptual engineering in the Definition and Evaluation of Alternatives Report will lead to the selection of the Preferred Alternative. The DEPARTMENT will coordinate with FRA, and as appropriate with railroad owners and operators, on this task.

Task 3: Service Development Plan

The DEPARTMENT, in coordination with FRA, will produce a SDP, which is focused on the Preferred Alternative identified in Task 2, following the outline approved in Technical Memo on Service Planning under Task 2. The SDP will lay out the overall scope and approach for the proposed service by clearly demonstrating the rationale, goals and objectives for new or improved intercity passenger rail service; identifying alternatives considered for the proposed new or improved intercity passenger rail service and analyzing the Preferred Alternative that best addresses the identified rationale, goals and objectives; demonstrating the operational and financial feasibility of the Preferred Alternative that is proposed to be pursued; and describing how the implementation of the SDP will be divided into discrete phases.

Specifically, the DEPARTMENT will include within the SDP:

Rationale, Goals, and Objectives including a description of the transportation challenges and opportunities faced in the markets to be served by the proposed service

Service justification to demonstrate how the proposed service can cost-effectively address transportation and other needs, based on current and forecasted travel demand and capacity condition

Planning methodology used in developing the SDP

Identification of alternatives considered in the planning and environmental review process, including intercity passenger rail improvements, improvements to other modes, and a no- action alternative, as well as the Preferred Alternative

Operations modeling, including railroad operation simulations, equipment and crew scheduling analyses, and terminal, yard and support operations, which in turn reflect such variables as travel demand and rolling stock configuration. If the proposed service shares facilities with rail freight, commuter rail, or other intercity passenger rail services, the existing and future characteristics of those services will be included

Station and access analysis to address the location of the stations to be served by the proposed service, how these stations will accommodate the trains and passengers associated with the proposed service, how passengers will access the stations, and how the stations will be integrated with connections to other modes of transportation. Refer to the FRA Station Area Planning recommendations at <<http://www.fra.dot.gov/eLib/Details/L03759>> and undertake the activities described in Section 2. Transportation

Travel demand and revenue forecasts, including the methods, assumptions, and outputs for travel demand forecasts, and the expected revenue from the service, including ridership/revenue forecasts that specify the number of passengers and boarding/disembarking at stations

Financial performance and projections for each phase of service, including operating costs and revenues, capital replacement costs, and other institutional arrangements affecting the system finances. The SDP will address the methods, assumptions and outputs for operating expenses for the train service including maintenance of way, maintenance of equipment, transportation (train movement), passenger traffic and services such as marketing, reservations/information, station, and on-board services, general/administrative expenses, cost-sharing arrangements, and access fees

Conceptual engineering and capital programming, to include equipment, infrastructure improvements, facilities, and other investments required for each discrete phase of service implementation

Benefit-cost analysis, including a description and quantification of benefits, whether operational, transportation output-related, environmental, and/or economic in nature as it relates to the affected passenger rail, commuter rail, and freight rail services and the communities in which the proposed improvements are located, with particular focus on job creation and retention, "green" environmental outcomes, potential energy savings, and effects on community livability

The DEPARTMENT will develop a draft Service Development Plan for FRA review and approval based on the agreed upon outline and methodology. The DEPARTMENT will incorporate FRA comments into the Final Service Development Plan for the Corridor Program.
