General Grant of Privilege Permit Application

The scope of work

I need a permission to install 6" inspection opening in the City sewer line outside of my property lines It should situate on the green area between the walkway and street because our house is built directly attached with the walkway (see the picture) Address 1639 North Hermitage Ave, Chicago, IL 60622

The reason for this work is root blockage in sewer line from our house to City sewers The blockage caused very bad flooding in our house, which was very costly, over \$7,000 The blockage and its position was checked with camera system The sewer line was first cleaned with 2" roter but it was not efficient in 6" pipe The second time it was cleaned with high pressure jet cleaner There is still some root growth in pipe, which is needed to get out and there is a danger that the roots will grow and block the sewer line again To keep the sewer line fully open it requires a 6" cleanout opening, which is City's responsibility to make according to the private dram program

We have had City's inspector to see the situation with camera system by a private plumber constructor in the beginning of June 2016

We are planning to move back to the house in 2-3 years
